

Flexo Direct on Rigid[®]

The New Way of Sustainable Decoration

As a pioneer of the printing world, Van Dam's latest technological breakthrough will turn the industry on its head.

"It's more evolution than revolution, but we are always pushing the boundaries of printing to the max to suit the industry's demands of the future," FDOR[®] Combines the best of both world in container decoration low cost and sustainability of direct print and high quality CMYK photographic image print of Flexo.

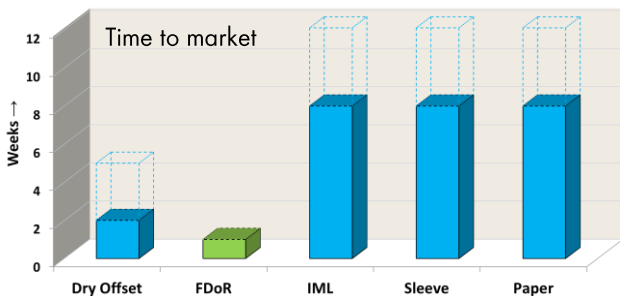

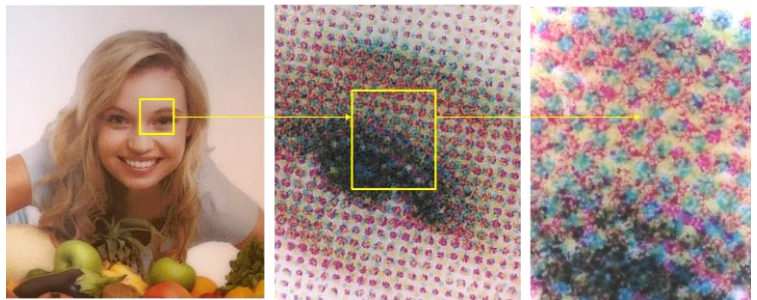

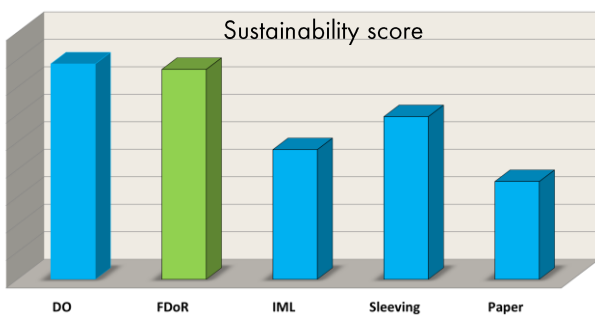

High sustainability score:

- Adding very small quantity of ink only
- No intermediate materials like labels
- Minimum use of plastics
- 100% recycling by de-inking

Direct print:

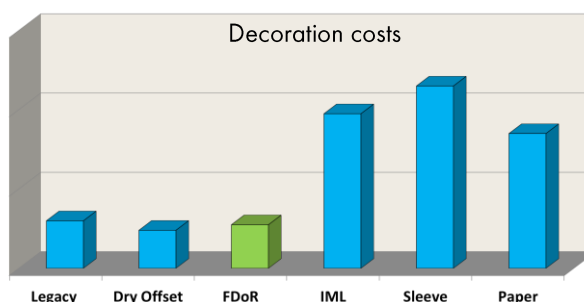

- High quality print up to 160 lines/inch
- Endless decoration options with CMYK+ (Extended Gamut)
- Superior constant quality
- High speed (650 ppm) and quick change over

With direct print, a new or modified design can be in productions in days, whereas other technologies take 8-12 weeks. Direct print offers maximum flexibility at the last minute the design can be selected and printed
